En **Grupo EMAC®** estamos comprometidos con la búsqueda de nuevos materiales orgánicos y naturales. Nuestra preocupación por el medioambiente, y una gran labor de I+D+i, han dado como fruto nuestro material exclusivo **MAXI**. **MAXI** es un material perteneciente a la familia de los WPC (Wood Plastic Composites) que incorpora fibras vegetales procedentes del reciclado de residuos orgánicos de la agricultura. Con él fabricamos perfiles de máxima calidad para cerámica.

In **EMAC® Group** we are committed to researching new materials more organic and natural. Our concern for the environment, together with an intense investigation work, all has resulted into our exclusive **MAXI** material.

**MAXI** is a material composed by pvc and Natural Fibers recycled from agricultural organic waste. And with it, we produce high quality profiles for tiles.
